

New SMUD HPP website: www.cbppca-hpp.org

Home Performance Program News May 2012

A note from Jim Mills at SMUD: I know how busy you were in March completing a huge amount of work in the previous SMUD Home Performance program, and that you caught your breath in April, but now is the time to get moving again and start submitting jobs to the new program. We have received less than 40 retrofit jobs since April 1; SMUD Management continues to closely watch the progress of the new program, and we need to show that there is demand for it. By the end of the year, we need 400 homes to be finished to consider this year a success. SMUD creates next year's program plans by mid-July of the current year, so it is critical that we see an uptick in jobs during the month of June. As the temperature rises, hopefully so will demand. Please do your best to convert some of your HVAC-only projects into Home Performance projects. I know it's a lot more work, but the finished results are far superior. The time is ripe to distinguish your company as the premier Home Performance Company in Sacramento, so let's roll!

-- Thank you, Jim Mills

CBPCA and BKi teams will be at [ACI June 5 & 6](#), so we won't be processing jobs those days, just so you all know.

Contractor Website Update: just a reminder that the new address for the SMUD HPP contractor website is www.cbppca-hpp.org – on that website you'll find all the information you need to ensure that you can participate in the

HPP successfully. Please familiarize yourself with the content, and contact Jim Mills (james.mills@smud.org) or the CBPCA (contractorsupport@thebpcac.org) with any questions.

Participating Contractor Agreement:

please remember that you can't submit any HPP retrofit jobs unless you have signed the Participating Contractor Agreement. Below are the contractors who have completed the PCA, and thus are eligible to participate in the new program, as of May 23, 2012:

Please review, sign, and return the completed Participating Contractor Agreement as soon as possible!

Air Sealing and Blower Doors: To ensure that your test-out numbers are correct, please operate your blower door while you are performing the air sealing necessary in your workscope. By doing so, you will be able to keep track of how tight the house is becoming as you air seal and eliminate any surprises after you air seal!

“Home Energy Digest” Booklet for Your Customers: You can access the informative homeowner-focused booklet here:
