

Newsletter May 31st deadline

2013 has started off with a bang as far as Home Performance projects are concerned, with over 250 projects currently booked. Congratulations to those of you who have found success within this program. Due to the increased job volume, the Program has to reduce the cost of assessment subsidies of \$200, as discussed in the March Contractor meeting. SMUD will continue to honor assessment applications submitted to the collection box in front of the SMUD Financing dept, 6301 S street prior to 5pm, May 31st.

Assessment applications received after this deadline will be paid at \$150 per assessment. The \$150 subsidy will continue throughout the summer, ending August 30th, 5pm. The subsidies thereafter will be paid at \$100 per assessment. Please submit your applications as early as possible to ensure you receive amounts you were expecting for your assessments. Just to be clear, the assessment amount is based upon SMUD receiving the completed applications and associated documents by the deadline date, not when the assessment was completed, and all other rules surrounding assessments are still in effect.

The JRT and rebate menu have been updated to offer a new installation measure: Air Sealing and Air Quality. This measure incentivizes air sealing throughout the home in addition to installing adequate mechanical ventilation per ASHRAE standards. The new JRT was sent to contractors by email on April 30. If you did not receive the latest version of the JRT, please visit cbpca-hpp.org/library to download the newest version. All new job submissions must use the updated JRT.

A final reminder: There is a \$200 early adopter rebate bonus for customers for jobs whose post-upgrade documentation is submitted and complete before 5 PM on June 30, 2013. Any post-upgrade documentation submitted after June 30 will not receive the \$200 bonus, even if the upgrade work was completed before that date. Therefore we suggest you allow several days to make any corrections required prior to this deadline to ensure your customer receives the full rebate expected.
